**Re: Draft Segments 6 and 7 Response Proposal for the Tittabawassee River
Settlement Agreement No. V-W-10-C-942
The Tittabawassee River/Saginaw River & Bay Site
Dow Submittal Number: 2017.069**

Ms. Logan:

Attached please find the Draft Segments 6 and 7 Response Proposal for the Tittabawassee River prepared by The Dow Chemical Company (Dow) for the Tittabawassee River/Saginaw River & Bay Site. For the purposes of the Draft Segments 6 and 7 Response Proposal, the remedy alternatives presented for each Sediment Management Area (SMA) consist of a single response technology. The characteristics of a SMA may be such that a combination of response technologies would be most appropriate to attain the optimal balance of effectiveness, implementability, and cost. The revised Response Proposal may include combination alternatives, developed with the Agencies.

Please let me know if you have any questions or concerns.

Sincerely,

A handwritten signature in black ink that reads "Todd Konechne".

Todd Konechne
